Richard,

I was looking through the field notes from the Pavillion well installation and saw a couple things which I'd like some clarification on.

<ftp://ftp.epa.gov/r8/pavilliondocs/WellDrillingInformation/DrillingLogsAndCuttingsDescription/FieldActivityLogC.pdf>

On the above link, first page, bottom-right quadrant, there's a passage that appears to say "diesel fuel lost from fitting, repaired."

In the original EPA draft report, [http://www.epa.gov/region8/superfund/wy/pavillion/EPA\\_ReportOnPavillion\\_Dec-8-2011.pdf](http://www.epa.gov/region8/superfund/wy/pavillion/EPA_ReportOnPavillion_Dec-8-2011.pdf), it said this:

"There were no incidents of fuel spillage used to power pumps and generators."

Next, this link:

<ftp://ftp.epa.gov/r8/pavilliondocs/WellDrillingInformation/DrillingLogsAndCuttingsDescription/DailyLogsFromDrillersJunSep2010.pdf>

If you scroll about three-quarters of the way down to Aug. 17, there's a passage where it talks about investigation accusations of antifreeze and cement spills (or at least that's what it looks like).

Last, this: <ftp://ftp.epa.gov/r8/pavilliondocs/WellDrillingInformation/DrillingLogsAndCuttingsDescription/FieldActivityLogE.pdf>  
About halfway down, Aug. 18 notes, there's a mention of a "clean up effort."

Can we talk on the phone about this? That's definitely my preference with something like this. I'm just trying to figure out what these different passages mean.

For the record, this email is typically a better way to contact me. The other is a personal address tied to my cell phone, which is great when I'm out of the office.

Thanks,

Adam Voge
